

It seems you people do not want to allow these services to the patrons of XM radio. Why not? You must remember who you are and who pays your salaries. We need those important updates just like anyone else on the road who listens to plain radio. Pull your heads out. If I'm out on the road I want to know if a tornado has been spotted close to me. Don't you think yor wife, husband, child, mother or father would want to know also?
